31:39-c Administrative Enforcement of Ordinances. –

Notwithstanding any other provision of law, a town may use the following provisions in the enforcement of its ordinances and regulations:

I. Any town may establish, by ordinance adopted by the legislative body, a system for the administrative enforcement of violations of any municipal code, ordinance, bylaw, or regulation and for the collection of penalties, to be used prior to the service of a formal summons and complaint. Such a system may be administered by a police department or other municipal agency. The system may include opportunities for persons who do not wish to contest violations to pay such penalties by mail. The system may also provide for a schedule of enhanced penalties the longer such penalties remain unpaid; provided, however, that the penalty for any separate offense shall in no case exceed the maximum penalty for a violation as set forth in RSA 31:39, III.

II. A written notice of violation containing a description of the offense and any applicable schedule of penalties, delivered in person or by first-class mail to the last-known address of the offender, shall be deemed adequate service of process for purposes of any administrative enforcement system established under paragraph I.

III. If the administrative enforcement system established under paragraph I is unsuccessful at resolving alleged violations, or in the case of a town that has not established such a system, a summons may be issued as otherwise provided by law, including use of the procedure for plea by mail set forth in RSA 31:39-d.

The Road Agent shall determine if it is necessary to take further action beyond posting, which determination shall be within the discretion of the municipality's governing board.

In addition, the notice shall:
 - a. Contain the date and time of the notice
 - b. Contain the date and time at which insufficiency was observed
 - c. Describe, at least in general terms, the location of the insufficiency with such detail as may permit it to be found without undue difficulty; and
 - d. Describe in reasonable detail the nature of the insufficiency
3. The municipality will provide forms upon which notices of insufficiency may be filed, but an individual need not use that form if the notice conforms to the requirements if law and this policy.
4. The municipality encourages other municipal officials and employees who may receive notice of an insufficiency to advise individuals to report the insufficiency as required by law and to advise appropriate officials of conditions called to their attention. However, the municipality cannot assure that any notice which is provided in a manner other than that specified for a formal notice under this section will actually be received by the appropriate official/employee and therefore must require that notices be provided as required by law and this policy.
5. Upon receipt of a notice of insufficiency, the individual receiving the notice shall first indicate on the notice or an appropriate form the exact time and date on which the notice is received and the identity of the person with whom it is filed. Upon receipt, the Town Administrator shall determine if the notice conforms to the requirements of this policy and the law. It is the municipality's intent to implement action to investigate any claimed notice of insufficiency which is reasonably identified in a notice even if the notice does not formally conform to the requirements of law and this policy, but the municipality does not thereby waive any immunity or limit of liability which otherwise would apply.
 - a. As soon as practicable, a determination shall be made as to whether an insufficiency exists. If it is determined that no insufficiency exists, the Town Administrator shall promptly advise the person filing the notice, and shall include a statement of the reasons as to why no insufficiency exists.
 - b. If an insufficiency is found to exist, the municipality shall take one or more of the following actions as appropriate to the circumstances and shall, at an appropriate time, notify the person filing the notice of the actions taken or planned.
 - 1) If the insufficiency was temporary and no longer poses a hazard, the Road Agent shall determine the likelihood of another occurrence and what action, if any, is required to prevent or post danger signals warning of such conditions. In most such cases, the posting of danger signals is not required unless there is a reasonable likelihood of a recurrence of the insufficiency.

- 2) If the insufficiency is not temporary, the Road Agent shall as soon as practicable post danger signals warning of the insufficiency. Within seventy-two (72) hours after receipt of the notice of insufficiency, the Road Agent shall develop a plan to remedy the insufficiency. The plan shall be implemented in good faith within a reasonable time. IF the insufficiency is not immediately remedied, appropriate danger signals shall be continued. The municipality may take reasonable interim action and shall determine if danger signals continue to be required. The reasonableness of any proposed remedy must consider the requirements that the expenditure of municipal funds may be made only in accordance with proper procedures.

1. As part of its routine road and sidewalk maintenance, the municipality conducts periodic inspections of their condition.

VI. ACTUAL NOTICE OBSERVATIONS

1. VII. CASUAL OBSERVATIONS

1. Only knowledge by or notice to those officials or employees designated in paragraph (5r) (b) shall impose an obligation to act as provided by RSA 231:92. While the municipality is not designating or authorizing any other municipal officials and employees to receive notice or otherwise commit the municipality to act in the interest of safety and efficiency, all municipal officials and employees are encourage to be observant of highway and sidewalk conditions and to advise Town Administrator if they observe any conditions which they believe might pose a problem. Any such advice provided to the municipality shall not constitute formal or actual notice or knowledge on the part of the municipality unless made in accordance with section four (3) or an official designated in paragraph (5) (B) (2) has actual knowledge of an insufficiency through personal investigation or observation.

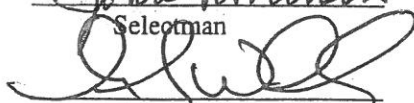

VIII. IMPLEMENTATION
