

Wild Winter Kids: Animals in Winter

Fr Fridays, January 8th & 15th, from 1-1:30 PM

Join Harris Center naturalist and wild mammal tracker Susie Spikol for this two-part, fun and educational ZOOM program. This winter become a track detective by learning how to tell a waddler from a bounder and coyote scat from deer poop. Find out how some animals, like bears, snooze winter away while others, like bobcats, spend their days stalking squirrels and hunting mice. Learn by looking at pawprints, patterns, feeding evidence, pelts, and mounted specimens. Share what you discover from week to week and discover what wild mammals are visiting your backyard and neighborhoods.

Sponsored by the
Antrim Recreation Department.

Perfect for children in Grades 1st-4th.

Registration required. Space is Limited.

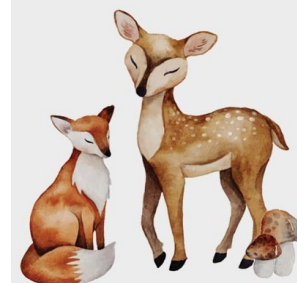

For more information, or to register for this free ZOOM program, contact Antrim Recreation via email at AntrimRecreation@tds.net, or by phone at 588-3121.
