Narrative:

Responded to the above address for a 27 year old female overdosing possibly on fentanyl. While on scene the patient's mother was on the phone and was very angry, she ordered her daughter to not go to the hospital and was berating her. The patient was slipping in and out of

consciousness at this point so I retrieved the phone and spoke with the mother and advised her that her daughter appeared to be overdosing and the ambulance was arriving to assess her. The mother stated that her daughter is not to go with the ambulance and she better be there when she arrives to pick her up. I advised her that her daughter was an adult and could make her own medical decisions. The mother was irate and hung up. A short time later a female arrived, parking her vehicle in front of the ambulance and blocking its path of exit. I advised the female that she needed to move her vehicle. She told me it was her daughter in the ambulance and I again advised her to move her vehicle as she was blocking an emergency vehicle in. She became very angry and requested my badge number. She subsequently moved her vehicle and allowed the ambulance to transport her daughter. The employees of the center informed me that they located bags of supposed drugs in the patients room, I requested the drugs for them to be seized and the staff advised me that they had already destroyed the drugs and no longer had them.
